

FERTILITY 2003

ABERDEEN SCOTLAND

13 - 17 July 2003

Aberdeen, Scotland

Aberdeen - 'The Granite City' is capital of Grampian Highlands and is famous for its sparkling granite buildings, well preserved history and North Sea Oil. It is the gateway to Scotland's castle and whisky country and is home to more castles than any other area in the UK. Aberdeen has one of Scotland's most striking skylines, and the granite buildings give the city its distinctive look, whilst old Aberdeen and the fishing village of Footdee, have an indelible air of a bygone era. It was in Old Aberdeen that Bishop Elphinstone established Aberdeen's first University, King's College, in 1495. In 1593 Aberdeen's second university was founded - at a time when there were only two in the whole of England. These two colleges united in the 19th Century to form the present day University of Aberdeen - the location of the Fertility 2003 Conference. The combination of this historic venue, the spectacular scenery and history of this city and the reputation of Scotland as a centre of leading medical and scientific research, make Aberdeen an ideal place for this exciting international conference.

The pace of life in Grampian may be far removed from the urban hustle and bustle but Aberdeen is the hub of an extensive transport network, making the region easily accessible. Direct flights from London take only 90 minutes. Direct flights are available from most UK airports and from many European cities. Many of the budget airlines also run services to Aberdeen.

Connections are frequent from all London airports. Aberdeen is easily accessible by road and train.

Only 90 Minutes from London Heathrow

Programme

Three state-of-the-art symposia:

- 'Reproductive research in the 21st century'
- 'Mechanisms of fetal programming'
- 'Reproductive consequences of ageing'

Nurses and Counsellors sessions:

- 'Holistic care - are we as good as we think we are?'
- 'Counselling - who needs it?'

A number of preconference workshops and courses including:

- 'Just Andrology' with British Andrology Society
- Two BFS/RCOG training courses, 'The general management of the infertile couple' and 'Assisted reproduction'
- 'Gamete cryopreservation' with British Society for Animal Science and Association for Clinical Embryologists
- 'Reproductive immunology' with the Reproductive Immunology Group and The Aberdeen Immunological Association both affiliated to the British Society for Immunology

On Monday 14 July there will be a traditional ceilidh at Aberdeen's famous Beach Ballroom.
