ABOUT BIOSCIENTIFICA

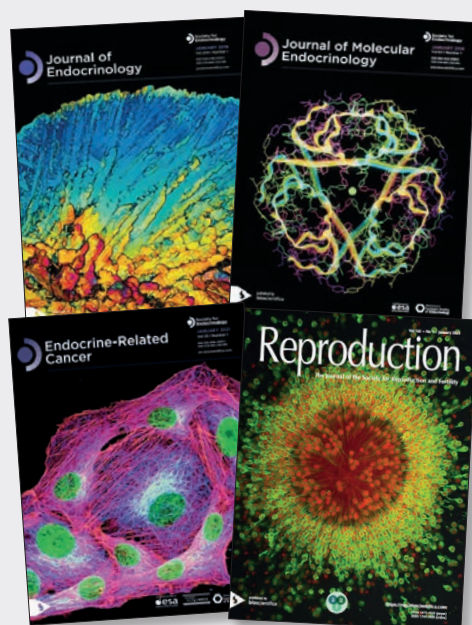

Bioscientifica collaborates with learned societies worldwide to provide high-quality publishing, events and association management to the biomedical community.

We are owned by the Society for Endocrinology and invest all our profits in our partner societies, helping to advance biomedical education, research and practice.

OUR JOURNALS

Bioscientifica's publishing portfolio includes four subscription journals, and eight open-access titles that are essential reading for both researchers and clinicians.

We only publish the highest-quality research: all of our four subscription titles are ranked in either the top or second quartile of their Journal Citation Reports® categories, and have an average rejection rate of 78%.

Journal of Endocrinology

OPEN-ACCESS JOURNALS

Bioscientifica publishes eight fully open-access publications.

Endocrine Connections

A journal that publishes original quality research and reviews in all areas of endocrinology.

endocrineconnections.com

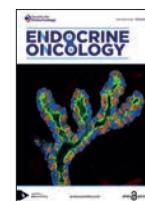

IMPACT FACTOR: 3.221

Vascular Biology

A journal devoted to vascular biology in disease, injury and regeneration. Full sponsorship of APCs during launch years.

vascularbiology.com

Endocrine Oncology

A broad-scoped journal from Bioscientifica on the interplay between hormones and cancer. Full sponsorship of APCs during launch years.

endocrine-oncology.com

Endocrinology, Diabetes & Metabolism Case Reports

A unique resource that publishes and links together clinical case reports across the fields of endocrine, diabetic, and metabolic medicine.

edmcasereports.com

Reproduction and Fertility

A journal from the Society for Reproduction and Fertility and Bioscientifica in the field of basic, translational, and clinical reproduction and fertility. Reduced APC during launch years.

reproductionandfertility.com

EFORT Open Reviews

A journal that publishes review articles across the field of orthopaedics and traumatology.

efortopenreviews.org

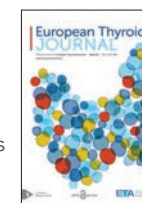

IMPACT FACTOR: 4.775

Redox Experimental Medicine

An open-access, peer-reviewed journal publishing redox research that advances our understanding of the effect of redox processes on human health and disease.

redoxexpmed.com

European Thyroid Journal

A journal from the European Thyroid Association on all aspects of thyroidology.

etj.bioscientifica.com

IMPACT FACTOR: 4.084

For more information, email sales@bioscientifica.com.

READ AND PUBLISH

Bioscientifica is committed to making the research published in its journals accessible to the widest possible audience. We've introduced a 'Read and Publish' agreement as an alternative to the traditional subscription model.

Institutions who sign up to the agreement get unlimited access to our four hybrid journals and archives; plus free open-access publishing for corresponding authors in these titles.

WHY CHOOSE A READ AND PUBLISH AGREEMENT?

- Transparent and cost-neutral pricing.
- Easy to administer: one annual fee covers both usage and publishing.
- Helps your institution to meet funding requirements, and to make open access the default publishing choice.

FIND OUT MORE

To find out how a Read and Publish deal could benefit your institution, email sales@bioscientifica.com.

For more information, email sales@bioscientifica.com.

OPEN-ACCESS IN HYBRID JOURNALS

For authors who choose to publish their article open access in a subscription or hybrid journal, Bioscientifica offers a 50% discount on open-access publishing if the library subscribes to that journal.

AUTHOR RESOURCE CENTRE

Bioscientifica also provides its authors with the support and resources they need to successfully publish their papers. The author resource centre provides advice on preparing a manuscript, guides authors through the publishing process and provides the latest news from our journals.

bioscientifica.com/authors

For more information, email sales@bioscientifica.com.

By distributing its profits back to the biomedical community, Bioscientifica supports scientific research, medical practice and the drive for better public health.

**Your subscription
enables our partners to:**

- Advance medical research through training events, where professionals share the latest clinical knowledge and experience.
- Produce treatment guidelines that enable health professionals to make more informed decisions about patient care.
- Distribute grants, awards and prizes that reward excellence at all medical and scientific career stages.
- Engage with the public through education events, interactive workshops, and free online resources, which help people to make informed decisions about their health.

Bioscientifica's publishing partners include:
